

Trump BANS Travel From China 1/31/20(WH)[2020]

The United States has confirmed cases of individuals who have a severe acute respiratory illness caused by a novel (new) coronavirus ("2019-nCoV") ("the virus") first detected in Wuhan, Hubei Province, People's Republic of China ("China"). The virus was discovered in China in December 2019. As of January 31, 2020, Chinese health officials have reported approximately 10,000 confirmed cases of 2019-nCoV in China, more than the number of confirmed cases of Severe Acute Respiratory Syndrome (SARS) during its 2003 outbreak. An additional 114 cases have been confirmed across 22 other countries; in several of these cases, the infected individuals had not visited China. More than 200 people have died from the virus, all in China.
